Muffler and exhaust manifold extension

Aluminum Spinner, Wing bags, APC propeller, Elevator/Stabilizer bags, Rudder bag

Plug in wings and elevators

The fuel tank has been moved to the center of gravity of the plane and the CG adjusted as required. The airplane has never been flown. The engine break-in process was started but the engine is far from broken in.

I hate to sell this plane but I need to clear some working space. I will offer the plane to club members first and then list it on RCG and Craig's List. I'm asking \$500 OBO. If you are interested, contact Bill Law at (360) 332-8822 or kodi7@comcast.net.
